In order to minimise the amount of trips required to change the batteries, Westcotec have advised that the best battery powered sign would be third option on the portable device list (highlighted). The battery life lasts around 2 weeks.

A Bluetooth collection unit can be fitted to this device. Westcotec also suggested buying some additional brackets to make it easy to move the sign around the village.

The total cost for the sign, Bluetooth collection and two extra brackets comes in at £3250 +VAT. We are awaiting confirmation from West Wittering on whether they would like to jointly fund the purchase, in which case the cost will be £1625 + VAT.
